causing a small stampede to a point Sold by all dealers. about twenty-two miles north and west of Miller's where J. P. Sparks of this city has opened up ground from which shipments can be made from the surface, according to authentic reports.

The district is best described as being about ten or twelve miles south of Republic, in the range of mountains west of Samuelson adobe. It is also eight miles due east of King Solomon.

Sparks discovered two veins. On one vein he has sunk a hole twelve feet in depth, and the highest assays received show 286 ounces in silver, 268 gold and 7 per cent lead to the ton. This ledge is about three feet in width and shipping ore is now being sacked by Sparks.

The second year is about 2000 feet distant from the original discovery. Assays from this body are not so high, the best report received being 150 ounces in silver, 98 in gold and 4 per cent copper. Claims through which this body passes have been bonded to Tonopah mining people. Several leases have also been granted by Spirks upon his original ground. About 75 claims have already been staxed in the district. A small sized rush was started about a week ago and since that date a number of new out fits have stampeded to this district .-Tenepah Bonanza.

Fortuna to be Worked.

Reports from persons interested in the Fortuna mine indicate that the company who has bonded the mine contemplates working it on an extensive scale. It is said that the plans for the new working differ materially from those by which the mine was formerly worked.

Then the stamp mill was located near the mine and water for all purpises was pumped from a well in the Gila Bottoms near Blaisdell a distance of about fifteen miles and at an elevation of something like a thousand feet, By the plans for the new work the mill is to be located near the pumping station and the ore will be sent to the mill by a tramway. It is calculated that the grade of the tramway is heavy enough for the down going loaded cars to draw the empty cars back to the mine.

At first however while the explorat on work is being done the old pump and pipeline which are still in place will be used to pump the comparatively small quantity of water needed.

H. C. Haupt, who was superintendent of the mill when the mine was previously worked has gone with a force of men to overhaul and rupair the pump and pipeline.-Yuma Sun.

Health a Factor in Success.

The largest factor contributing to a man's success is undoubtedly health. It has been observed that a man is seldom sick when his bowels are regular-he is never well when they are constipated. For constipation you will and nothing quite so good as Chamber lain's Tablets. They not only move the bowels but improve the appetite and strengthen the digestion. They are sold by all dealers.
